Odesa, Ukraine

Objective

Extremely motivated for career change goal

Profile

As a team-oriented Engineer, I am looking to start my career as a QA\QC. I'm confident that my experience as a user of various specialize software, as well as the life experience of a person who combines an artist and an
engineer, can benefit the team.

Skills

• Understanding of software development lifecycle, continuous integration and deployment (CI/CD), knowledge of testing methodology and software testing theory

• Knowledge of the theoretical testing process and approaches

• Experience with Bug Tracking (Mantis, Jira), Test Management (TestRail, TestLink), Test tools and frameworks (Selenium, JMeter, Gherkin, Cucumber, TestNG, Allure), Collaboration (Confluence)

• Experience in writing Java frameworks for testing a website using BO and PO architecture

• Knowledge of client-server architecture/web applications

• XML, HTML, CSS, XPath, Chrome DevTools, SQL, Git, Log4j

• Java Core and OOP principles, build tools (Maven, Gradle), development tools (IntelliJ IDEA)

Work experience
• Education project of writing you own framework for testing the web site at the courses of automation software testers Cursor Education using different test tools
• Education project of testing the website, mobile app, and games at the courses of manual software testers QATestLab and SkillUp. Includes: requirements analysis, test planning, test case development, setup environment, test execution, test cycle closure, creation and maintenance of test artifacts during the cycle.
